DETAILED ACTION

Election/Restrictions

- 1. This application contains claims directed to the following patentably distinct species of the claimed invention:
 - I. Figures 1-6.
 - II. Figures 7A-15.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

Application/Control Number: 10/049,458 Page 3

Art Unit: 2636

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

- 2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- 3. Claims 1-14 and 22 are objected to because there are many typographical errors.

In claim 1, line 5, the phrase "a receiving antenna 110" should be changed to - -a transmitting antenna 110--.

In claim 2, line 2, the phrase "the digital data" should be changed to - -a digital data--.

In claim 2, line 2, the phrase "a narrow" should be changed to - -the narrow--.

In claim 5, line 4, the phrase "a tank" should be changed to - -the tank--.

In claim 7, line 2, the phrase "a receiving antenna" should be changed to - -the receiving antenna--.

In claim 7, line 8, the phrase "said LF" should be changed to - -LF--.

Application/Control Number: 10/049,458

Art Unit: 2636

In claim 7, lines 8-9 and 10, the phrase "comparison-determination" should be changed to - - comparison-determination output--.

In claim 9, line 11, the phrase "a comparator 312" should be changed to - -the comparator 312--.

In claim 13, line 14, the phrase "the correction" should be changed to - -the correction--.

In claim 14, line 2, the phrase "said several" should be changed to --several--.

4. Claims 1-14 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "said two RFs" in line 10. There is insufficient antecedent basis for this limitation in the claim. That phrase "said two RFs" should be changed to --said to RF signals--.

- 5. <u>Claims 1-14 and 22</u> would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.
- 6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Reindl, Nysen, Werb, and Brady teaches the use of transponder identification systems.
